

C240 IP Rated Fingerprint Clocking System

Our C240 fingerprint clocking system is IP rated and fully resistant to ingress by dust, dirt, grease, water, and debris. Ideal for outdoor installation, the C240 accepts attendance clocking through fingerprint, RDID proximity, or secure PIN.

Clocking Methods

Fingerprint clocking is quick, easy, and fully secure. Staff register attendance by placing their enrolled finger on the C240's fingerprint scanner, where an audio and visual message confirms the clocking.

Proximity clocking is swift, simple, and completely contactless, minimising wear and tear. Staff simply pass their assigned RFID badge or keyfob in front of the C240 terminal, where an audible and visual message confirms the clocking.

Registration & Recording

Fingerprint registration is extremely quick and simple. Multiple biometric records can be registered for each employee to guard against accidents or damage to a specific fingerprint, and the C240 has the capacity for as many as 3000 fingerprint templates.

Data Storage & Download

Clocking data is stored on the C240 terminal until downloaded via Ethernet or USB into the ClockRite timesheet software. Here individual timesheets can be calculated and detailed reports are available to manage attendance and payroll data. Once downloaded, all data is stored securely on your PC or server.

Time and Attendance with Door Access Control

The C240 terminal can also be enabled for access control by utilising biometric and proximity credentials in tandem. Under this configuration each employee can register up to 16 attendance clockings and unlimited access control events each day.

Entry/Exit and Multiple Door Scenarios

The C240 will link to most internal or external doors, working as a switch to open the locking mechanism for authorised users. The terminal can be used in tandem with our biometric and proximity peripheral door controllers to manage entry and exit on either side of a single door, or to control movement through two or more separate entry points.

ClockRite Software

The C240 clocking system incorporates our in-house ClockRite Software suite to provide an intuitive and versatile time and attendance management solution for your business. Basic and overtime hours are calculated automatically according to your specific shift patterns, while late starts, early finishes, grace and roundings can be managed and defined at the click of a button. Holidays and absence are recorded in detail for individual employees, and comprehensive reports make payroll preparation quick and easy.

Features:

- Robust, IP 65 rated design suitable for all weather conditions
- Stores up to 3,000 fingerprint templates, 10,000 card holders and 50,000 logs without PC download.
- Integrated RFID 125kHz, Reads fingerprint, RFID card, and PIN
- With Audio & Visual indications for acceptance or rejection of verification
- Built-in Ethernet port
- USB download facility

Specifications:

- Display: 37x20mm OLED
- Fingerprint Capacity: 3,000 templates
- Card Capacity: 10,000
- 1 touch a-second user recognition
- Transaction Capacity: 50,000
- Communication: TCP/IP, USB-host,
- Power Supply Input: 100 - 240V AC via UK 3 pin plug
- Power Supply Output: 12V DC / 3.0A via supplied adapter
- Operating Temperature: -10 - 50 C
- Index of Protection: IP65
- Dimensions (mm):
 - Width: 63.5
 - Height: 185
 - Depth: 42

Also Included:

- ClockRite PC Software
- Full Instructions
- 12 Months Support
- Sage Payroll Link
