

C-100 Proximity Clock

Our entry level time and attendance clock provides you with a robust and reliable proximity card clocking machine for up to 1000 employees.

Proximity Time & Attendance System – How It Works

Employees use the C-100 proximity clocking machine to register 'in and out' simply by passing their personal proximity badge in front of the clock. They will receive an audible and visual message to confirm the clocking. For additional security a personal 'pin' number can also be used.

The time tracking capability of the C-100 proximity clock is up to 16 attendance clockings per day.

Proximity Capacity & Recording

The C-100 proximity time clock stores all employee names and the associated employee number. The clocking machine and the proximity badges use built in RFID chips to record attendance activity. Proximity RFID technology is ideal for time tracking in all working environments as it is a contact less form of attendance time clocking. The C100 proximity time clock has the capacity for up to 1000 employees.

Clocked Data Storage

Attendance clockings are stored in the C-100 clocking machine until they are down-loaded to the ClockRite software where attended hours are calculated and a selection of reports are available to track and manage employee time and payroll data.

Your employee attendance & absence data will be stored indefinitely on your server for future reference.

This clocking system package incorporates our flexible attendance time software including an easy to use suite of reports.

Our attendance time software suite will enable you to prepare your payroll information quickly and easily. Basic and overtime hours are calculated automatically, late starts and early finish, quarter roundings are found at the click of a button. Holidays and other absences are recorded in detail for individual employees.

Features:

- High-efficiency proximity card/key fob identification
- Standard 125kHz Proximity Card Reader
- Built-in Serial and Ethernet ports
- Built in bell scheduling
- Multi Language Support

Specifications:

- Card Capacity 30,000
- Transaction Capacity 100,000
- Hardware Platform ZEM500
- Communication RS232/485, TCP/IP
- Display Black & White LCD
- Power Supply 5V DC 2A
- Operating Temperature 0 - 45 C
- Operating Humidity 20% - 80%

C-100 Package:

- C-100 Clocking System
- ClockRite PC software
- Starter pack of proximity badges or keyfobs
- Instructions
- 12 Months Support
- Sage Payroll Link
- Free Delivery
