

C100 Proximity Clocking System

A ClockRite proximity clocking system provides detailed, accurate time and attendance information for your business. The C100 utilises durable RFID Cards or Key Fobs for contactless clocking, making it extremely reliable and suitable for any working environment. All attendance data links directly to our UK timesheet software.

A Proximity Time & Attendance solution is suitable for businesses of any size, and can be scaled for companies with more than one location. Intuitive WiFi setup also eliminates the need for network cables.

Clocking Method

Proximity clocking is quick, easy, and makes clocking completely non-touch, minimising wear and tear. Staff register attendance by passing their RFID Card or Keyfob in front of the reader on the Terminal, where each attendance clocking event is accompanied by an audible and visual message to confirm success. The ClockRite System has the capacity for up to 16 attendance clockings per Employee per day.

Registration & Recording

The Employee Name and ID is sent from the Software and the Terminal stores all this information securely. Proximity Cards and Keyfobs contain an RFID chip which communicates the Employee ID with the Terminal. The C100 Proximity clocking system has the capacity for as many as 1,000 staff. If you need a proximity clocking system for more than this, please call us to discuss your requirements in detail.

Data Storage & Communication

Clocking data is stored on the C100 Proximity Terminal until downloaded over your Local Area Network (Ethernet) into our fully supported, UK developed Time & Attendance software. The C100 also supports data download via USB, ensuring data can be retrieved in case of Network outage.

Once downloaded, individual time sheets can be calculated and detailed reports are available to manage Attendance and Payroll data. Once downloaded, all data is stored securely on your PC or server.

ClockRite Software

The C100 proximity clocking system incorporates our in-house ClockRite Software suite to provide an intuitive and versatile time and attendance management solution for your business. Basic and overtime hours are calculated automatically according to your specific shift patterns, while late starts, early finishes, grace and roundings can be managed and defined at the click of a button. Holidays and absence are recorded in detail for individual employees, and comprehensive reports make payroll preparation quick and easy.

Features

- High efficiency proximity card/keyfob identification
- Standard 125kHz proximity reader
- Built in serial, ethernet, and USB ports
- Built in bell scheduling
- Multi language support
- Door access control
- Support for external proximity weigand reader
- Audio & visual verification feedback

Specifications

- Hardware Platform: ZMM
- Transaction Capacity: 50,000
- Communication: RS232/485, TCP/IP, USB-Client
- Card Support: RFID Card(Standard)
- Power Supply: 12V DC 1.5A
- Operating Temperature: 0 - 45 C
- Operating Humidity: 20% - 80%
- Dimensions (mm): H ≥ 144 | W ≥ 96 | D ≥ 40

Package

- C100 Proximity Clocking Terminal
- 2x ClockRite Time & Attendance Software Licences
- Free UK Mainland Delivery
- 30 Day Money Back Guarantee
- 12 Months Unlimited UK Remote Support
- Detailed Online Setup and Usage Guides
- Sage Line 50 Payroll Link
