C200v2 Fingerprint Clocking System

Our bestselling Fingerprint Clocking System provides detailed, accurate Time & Attendance data and integrates seamlessly into your existing Wired LAN. Biometric security prevents employees buddy clocking and ensures staff can't clock each other in or out. All attendance data links directly to our own UK T&A Software and makes your payroll management easy.

A Fingerprint Time & Attendance solution is suitable for businesses of any size, and can be scaled for companies with more than one location.

Clocking Method

Employees register fingerprint clockings with biometric security, leaving you safe in the knowledge that they cannot clock each other in or out. The terminal also supports contactless clocking via an RFID Proximity Card or Keyfob, with the option of a personal PIN for additional security.
Each attendance clocking event is accompanied by an audible and visual message to confirm success.
The ClockRite System has the capacity for up to 16 attendance clockings per Employee per day.

Registration & Recording

Fingerprint registration is extremely quick and easy, taking just ten seconds per staff member. Multiple fingerprints can be registered in case of accidents or damage to a specific fingerprint. The C200 Fingerprint clocking system has the capacity for as many as 500 staff. If you need a Fingerprint clocking system for more than this, please call us to discuss your requirements in detail.

Data Storage & Communication

Clocking data is stored on the C200 Fingerprint Terminal until downloaded over your Local Area Network using Ethernet into our fully supported, UK developed Time & Attendance software. The C200 also supports data download via USB, ensuring data can be retrieved in case of Network outage.
Once downloaded, individual time sheets can be calculated and detailed reports are available to manage Attendance and Payroll data. Once downloaded, all data is stored securely on your PC or server.

ClockRite Software

Our ClockRite Software provides an intuitive and versatile Time & Attendance solution for your business. The software utilises attendance data from the C200 Fingerprint Clocking Terminal to make payroll preparation quick and easy. Install to multiple PCs as required and create multiple user profiles with their own permissions to ensure staff can only access information relevant to their role.

Features

- Colour TFT screen with GUI Interface for ease of use
- Optical Sensor
- 1 touch a-second user recognition
- Stores 500 Fingerprints and 50,000 Transactions
- Reads Fingerprint, RFID and/or PINs
- Built-in Ethernet port
- Built-in USB port allows for backup and manual data transfer
- Audio-Visual feedback for attendance events

Specifications

- Hardware Platform: ZMM510
- User Capacity: 500
- Fingerprint Capacity: 500
- Transaction Capacity: 50,000
- Communication: TCP/IP (Ethernet), USB Type A
- Card Support: RFID Card(Standard)
- Power Supply: 5V DC 2A
- Operating Temperature: 0 - 45 C
- Operating Humidity: 20% - 80%
- Dimensions (mm): H>152 | W>168 | D>33
