

C100 Proximity Clocking System

A ClockRite proximity clocking system provides detailed, accurate time and attendance information for your business. The C100 utilises durable RFID badges or keyfobs for contactless clocking, making it extremely reliable and suitable for any working environment. All attendance data links directly to our UK timesheet software.

Proximity Clocking

Proximity clocking is quick, easy, and completely contactless, minimising wear and tear. Staff register attendance by passing their assigned RFID badge or keyfob in front of the proximity terminal, where an audible and visual message confirm the clocking.

Each employee can register up to 16 attendance events each day.

Registration & Recording

The C100 securely stores all employee names and associated employee numbers. Proximity badges and keyfobs contain a built in RFID chip which communicates with the clocking terminal. The C100 has the capacity for as many as 200 staff.

Data Storage & Download

Clocking data is stored on the C100 clocking terminal until downloaded via LAN or USB into our time and attendance software. Here individual time sheets can be calculated and detailed reports are available to manage attendance and payroll data. Once downloaded, all data is stored securely on your PC or server.

ClockRite Software

The C100 proximity clocking system incorporates our in-house ClockRite Software suite to provide an intuitive and versatile time and attendance management solution for your business. Basic and overtime hours are calculated automatically according to your specific shift patterns, while late starts, early finishes, grace and roundings can be managed and defined at the click of a button. Holidays and absence are recorded in detail for individual employees, and comprehensive reports make payroll preparation quick and easy.

Features:

- High efficiency proximity card/keyfob identification
- Standard 125kHz proximity reader
- Built in serial, ethernet, and USB ports
- Built in bell scheduling
- Multi language support
- Door access control
- Support for external proximity weigand reader
- Audio & visual verification feedback

Specifications:

- Display: B&W LCD
- Transaction Capacity: 50,000
- Card Capacity: 10,000
- Communication: TCP/IP, USB-host
- Weigand In/Out
- Power Supply Input: 100 - 240V AC via UK 3 pin plug
- Power Supply Output: 12V DC / 3.0A via supplied adapter
- Operating Temperature: 0 - 45 C
- Operating Humidity: 20% - 80%
- Dimensions (mm):
 - Width: 96
 - Height: 144
 - Depth: 40

C100 Package:

- C100 Proximity Clocking Terminal
- ClockRite PC Time & Attendance Software
- Proximity Badges or Keyfobs Included
- Detailed Online Setup and Usage Guides
- 12 Months Remote Support
- Sage Payroll Link
- Free UK Mainland Delivery
