

## C150 Wireless Proximity Clocking System

Our C150 wireless proximity clocking system provides detailed, accurate time and attendance data for your business. The C150 utilises swift, secure RFID technology for quick and easy clocking. WiFi capability ensures convenient connectivity without the need to run cables.

### Clocking Methods

Proximity clocking is swift, simple, and completely contactless, minimising wear and tear. Staff simply pass their assigned RFID badge or keyfob in front of the C150 terminal, where an audible and visual message confirms the clocking.

Each employee can register up to 16 attendance events each day.

### Registration & Recording

The C150 securely stores all employee names and associated employee numbers. Proximity badges and keyfobs contain a built in RFID chip which communicates with the clocking terminal. The C150 has the capacity for as many as 200 staff.

### Data Storage & Download

Clocking data is stored on the C150 terminal until downloaded via WiFi, Ethernet, or USB into the ClockRite timesheet software. Here individual timesheets can be calculated and detailed reports are available to manage attendance and payroll data. Once downloaded, all data is stored securely on your PC or server.

### ClockRite Software

The C150 clocking system incorporates our in-house ClockRite Software suite to provide an intuitive and versatile time and attendance management solution for your business. Basic and overtime hours are calculated automatically according to your specific shift patterns, while late starts, early finishes, grace and roundings can be managed and defined at the click of a button. Holidays and absence are recorded in detail for individual employees, and comprehensive reports make payroll preparation quick and easy.

## Features:

- Colour TFT screen with GUI Interface for ease of use
- 1 touch a-second user recognition
- Integrated proximity or smart card reader
- Built-in 2.4GHz Wireless and Ethernet ports
- Built-in USB port allows for backup and manual data transfer
- Audio-Visual indications for acceptance events

## Specifications:

- Transaction Capacity: 100,000
- Hardware Platform: ZEM510
- Communication: RS232/485, TCP/IP, USB-client
- Card Support: ID Card(Standard), optional HID/Mifare Card
- Power Supply: 12V DC 3A
- Operating Temperature: 0 - 45 C
- Operating Humidity: 20% - 80%
- Dimensions (mm):
  - Height: 157
  - Width: 210
  - Depth: 50

## C150 Package:

- C150 Fingerprint Clocking Terminal
- ClockRite PC Time & Attendance Software
- Detailed Online Setup and Usage Guides
- 12 Months Remote Support
- Sage Payroll Link
- Free UK Mainland Delivery
